## A/V Overview for Jon Petz

### Audio Requirements

- Speaker travels with wireless Countryman E6 microphone and necessary adaptors to be used with *Shure*, *Sennheiser* and *Audio Technica* systems.
- One wireless handheld microphone on stand for audience interaction.
- A professional sound system capable of room-filling vocal and musical audio is critical to a successful event. Music is played via Speaker's laptop computer and recommends (and carries) a direct box or media adaptor.

### Video & Graphic Projection

- Speaker will project graphics/video via a Mac laptop computer and carries VGA and HDMI Mac adaptors for projector connection.

### Live Camera Feed / Image Magnification (if applicable)

- If a live video feed is being projected via iMag, Speaker highly suggests a scheduled 15 minutes of rehearsal with camera operators and director.

### Stage

- Speaker will require audience access during the keynote and audience members will participate on stage. Recommend that the audience be kept as close to stage as possible (no "moat" needed in front of stage).
- Speaker does not require a lectern / podium. If one is used for other presenters, it should either **not** be positioned stage center, or, be moveable to allow for audience participation to take place on center stage for non-obstructed viewing.

---

### Other

- A standard catering tray stand ("Tray Jack") on stage with a covering linen.
- One stool or high top chair on stage center.
- Food should NOT be served or cleared during performance.
- Four (4) armless and non-rolling chairs to be used on stage if "team member levitation" is being presented.
- Room temperature water is appreciated if available.
- Access to conference bookstore will be provided, or, a small table at the back of the room by main exit doors for book display and related material.
